Education

Faculty of computer science and engineering ✉

Field of Study: Applied Information Technologies

2022 – present | Skopje, North Macedonia

High School: Gimnazija Sveti Kliment Ohridski,

Field of Study: Natural Sciences and Mathematics

2018 – 2022 | Ohrid, North Macedonia

Courses

Build your Own Self Driving Car, Udemy ✉

Technologies: Raspberry Pi, Arduino, OpenCV, Machine Learning.

JavaScript Tutorial Full Course - Beginner to Pro, Online Course

Technologies: JavaScript, HTML, CSS, Git.

Projects

Student Connect

03/2025 – present

Currently working on a team project, **Student Connect**, a web application developed using Java Spring Boot, Thymeleaf, and PostgreSQL, designed to connect students through a listing platform. The application allows users to post and search for listings related to accommodation, tutoring, internships, roommates, and other student needs.

Technologies: Java Spring Boot, Spring Security, Thymeleaf, PostgreSQL

Self-Driving Car

02/2025 – present

Currently developing a **self-driving car** utilizing Raspberry Pi, Arduino Uno, and machine learning for autonomous navigation. The car is designed to drive independently, recognize and respond to traffic lights, overtake vehicles, perform U-turns, and make real-time decisions.

Technologies: Raspberry Pi, Arduino Uno, C++, Machine Learning, Detection Sensors

Expense Tracker App

07/2024 – 08/2024

A web application has been developed for tracking expenses and income, with the ability to categorize transactions. The application displays financial data, and users have access to transaction history and the ability to analyze their financial information.

Technologies: C#, HTML, CSS, JavaScript, Asp.Net ✉ Core MVC

Professional Experience
